## FOAM UNITS

**4071 FOAM UNIT** is a simple at-the-pump unit to educt foam concentrate into hose lines. It is Mounted between the discharge and suction side of a pump. For use on portable forestry pumps or fitted permanently to skid units, the 4071 is a simple and effective way to add a foam capability to equipment. The unit is adjustable, permitting various foam percentages to be inducted depending on the nozzles being used. A 4071 includes the eductor, pressure hose and pick-up hose. A 4071KIT includes the eductor, pressure hose, pick-up hose and two connecting tees.
